Attachment C Snack and Party Ideas

Snacks are important to provide nutrients for growing children.

- 1. Include a wide variety of foods that are rich in nutrients.
- **2.** Have healthful snacks available and easily accessible. Cut up fruits and vegetables for easy eating, especially children with loose teeth or braces.
- 3. Try low-fat versions of milk, ice cream, crackers, and chips.
- **4.** Avoid using food as a reward or punishment.
- **5.** Be a good role model by eating healthful snacks with your children/students.
- **6.** Choose fruits and vegetables as snacks so children/students can meet the goal of eating at least three or more servings of vegetables and two or more servings of fruits a day.
- 7. Involve children/students in planning and shopping for foods and beverages for snacks and parties.
- **8.** Involve students in planning a party that provides healthy food choices and activities that do not focus the party on food.
- **9.** Offer food again, even if children/students did not like it the first time, especially fruits and vegetables. Students need repeated exposure to new foods.
- **10.** For more information, call the free American Dietetic Association Hotline at: (800) 366-1655 or visit the website at http://www.eatright.com.

Alternatives to Using Food as a Reward

Using food as a reward undermines nutrition education, encourages overconsumption of extra calories, especially foods high in fat and added sugar, and teaches children to eat when they are not hungry. Some alternatives for rewarding children include:

Sit by friends	Keep a treasure box filled with non-food items
Give a set of flashcards or books	Go for walks
Reading time	Give stickers, pencils, and other school supplies
Extra time for art or music	Offer dress down day
Hold class outside	Offer free time at the end of the week
Listen to music while working	Eat lunch with the principal or teacher
Play a favorite game or puzzle	
Dance to favorite music
